

## OUR MISSION

Technalink is a leading IT staffing and consulting firm intensely committed to providing efficient and high quality staffing solutions. We have a global network of IT industry contacts and resources, a fresh understanding of what is required to excel, and a focus on IT innovations to help clients maintain their competitive advantage. Our strength is leveraging our industry expertise to link the right professionals with our clients via Information Technology.

## Why Technalink?

Extraordinary people, incomparable customer service, and up-to-date technological experience make us the right choice for you. We aim first to understand your company and its specific needs. Our rigorous and comprehensive recruiting process, focused on quality and retention, allows us to offer the right pre-screened candidates with the proper technical skills and work ethic. We make communication a priority throughout the entire process, so you can be confident we are working hard to meet your needs.

## About Us

With over 13 years experience in the Information Technology consulting industry, our management team has a proven track record of providing high quality IT staffing and recruiting support. We work with public and private corporations as well as associations and state and local governments. Our clients include industry leaders in the Telecommunications, Financial Services, Healthcare and Transportation sectors.

At the heart of Technalink is an experienced recruiting and sales team built on solid relationships and a commitment to providing quality resources to our clients. As technology evolves and we continue to grow, we remain committed to the same goal: "Making IT work for you".

Technalink, Inc. is 8a certified and a registered Local Disadvantaged (minority & woman-owned) Business Enterprise. NAICS codes include: 541511, 541512, 541513, 541519, 561320.

Technalink is WBENC (Women's Business Enterprise National Council) certified as a woman-owned business.

## LIST OF CLIENTS

Our vibrant network cultivated by years of IT industry contacts and resources delivers proven results. We are able to maximize your IT spending by offering highly skilled IT professionals where and when you need them.

Whether you are a large global conglomerate or a small local company, our streamlined, thorough and efficient screening process allows us to meet your needs and exceed your expectations. Our robust database of consultants can deliver support throughout the entire IT lifecycle of any project.

We specialize in anticipating needs, meeting challenges, finding solutions and producing the results to ensure your success.

“ I have been working with Technalink for six years. During this time, Technalink has met our needs to find candidates ranging from non-techs and system administrators to higher level engineers. Technalink is flexible to work on a moment’s notice. Technalink stands out because they understand our staffing requirements and are able to produce high quality candidates who are well-screened.

To offer an example, we needed to staff a network operations center that was starting from the ground floor. We did not have any staffing and Technalink was able to help build up our staff while meeting our financial, staffing and timeline requirements. The result was we were able to open up on time.

I always recommend Technalink to anybody who needs subcontract work. ”

*Rickie Singleton, Director of Network Operations*

“ At the World Bank, we have over 20,000 employees and work in over 190 countries. I have been working with Technalink for eight years. During this time, Technalink has met our needs to find highly qualified candidates, including some with security clearance, to lead projects and to perform in many different policy, compliance and office roles. Technalink has never presented a candidate to me that was inappropriate or unqualified for the position I was seeking to fill.

Technalink is very professional, understands our staffing needs, provides the right amount of account management to make the process smooth, and their pool of candidates is of very high quality. To illustrate, eight years ago, we were looking for a highly qualified UNIX network candidate. Technalink provided such a person who is still with the World Bank and is now managing his own team. ”

*Jim Nelms, CIO*

“ I am a senior security engineer specializing in certification and accreditation. By working with Technalink, I was offered a permanent position with a large government agency. I am currently working on a Department of Transportation government contract. My experience with Technalink was very positive. Technalink delivered on every promise that was made. What stands out the most about Technalink is that they are very upfront and honest. ”

*Paul Huber, Senior Security Engineer*
